

DDoS MITIGATION

For businesses large and small, DDoS is a threat you can't ignore.

Minimize the impact of DDoS attacks to your business or organization.

Distributed Denial of Service (DDoS) attacks are more frequent, more complex and can have a great impact to your business. World leader in DDoS protection, Arbor Networks, states, "The attack doesn't have to be massive to impact your organization — it only has to be as large as your network pipe."

If your network seems to be doing just fine and there is no sign of a DDoS attack, think again. The latest attacks are becoming more and more difficult to detect than ever before.

Everyone is a potential DDoS target — everyone is at risk. According to Arbor Networks 2016 ATLAS statistics, 80% of all attacks are less than 1 Gbps. These difficult-to-detect, low-and-slow application attacks are easy to launch with minimal resources, yet still can have significant impact to services.

DDoS attacks can be disruptive and can potentially compromise business operations. Businesses and organizations must partner with teams, like DQE, that can detect, respond and mitigate these attacks. After all, the faster you can detect and mitigate, the less impact these attacks will have.

Benefits of adding DQE's DDoS Mitigation services to your customized DQE Internet Solution:

- Improved Network Availability
- Customized, Scalable & Flexible
- Quick Response Times
- Customer Remains Hands-off
- Local, Established Partner
- Cutting Edge Technology

Prepare for the Future

When it comes to DDoS attacks, it pays to prepare. These threats are going to continue to evolve and become even more sophisticated and evasive. With DQE's advanced detection and DDoS Mitigation solution, your business can rely on our immediate response team of industry experts, dedicated to you.

The DQE Internet + DDoS Mitigation offering

When it comes to business continuity, you want to be sure you've got your bases covered. With DQE, you can experience fast and reliable Internet speeds for your business or organization, plus have the opportunity to add DDoS Mitigation to your DQE Internet service offering at any time.

Contact your DQE Sales Representative to learn more about DQE's DDoS Mitigation services.
