

METRO ETHERNET SOLUTION

Cost-effective, exceptionally reliable, secure and simple to maintain

Fast and Reliable Ethernet Service for Your Business

With committed speeds from 10 Mbps to 10 Gbps, DQE's Metro Ethernet network solution extends your Ethernet LAN over our wide area network (WAN), connecting each of your users via a redundant, secure, fiber-optic network.

Exceptionally Reliable

- Reliability of the network is unmatched, as our low-latency core ring configuration is designed to be more dependable.
- Less than 50 millisecond failover in the event of a fiber cut.
- DQE operates, manages and monitors the network, end-to-end, 24/7.
- Best-in-class Service Level Agreements (SLAs).

Superior Security

- A true, Private Network, which inherently creates a much more secure solution than an internet-based Virtual Private Network.
- Additionally, DQE's all-optical path provides far greater physical network security than electrically-based transport.

Guaranteed Scalability

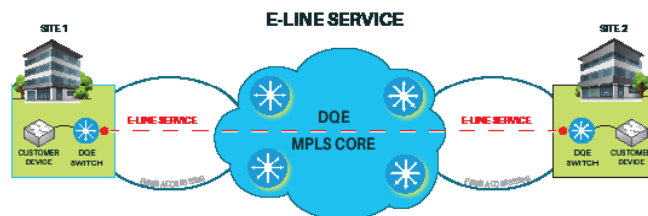

- Our custom solutions are always flexible and can easily scale with all of your business' increasing bandwidth demands.

Highlights of DQE's Metro Ethernet Solution

- Fast, reliable, secure, managed Ethernet over a 100% fiber optic network
- Cost-effective, robust and easy to maintain
- Redundant core ring configuration
- 24/7/365 network monitoring

Customized E-LINE Solution:

High-speed LAN-to-LAN connectivity between two enterprise locations

Customized E-LAN Solution:

Connects multiple enterprise locations together in a private any-to-any LAN that extends throughout, and beyond, the metro area
