SD-WAN

Gain Control of Your Network

In today's digital environment, businesses of all sizes, locations and budgets need to be resilient, secure and reliable. Backed by DQE's 100% fiber network, our SD-WAN（Software-Defined – Wide Area Network）solution ensures reliable connectivity, intelligent bandwidth optimization and smoother application performance for both single and multi-location businesses. Easily connect users, applications, and data regardless of location, with minimal disruption and seamless implementation.

Features of DQE's SD-WAN

- Fast, reliable fiber network for internet connectivity
- Accelerated reachability and secure access to applications
- Performance visibility and reporting tools
- Streamlined, centralized network management
- Secondary wireless connection that augments fiber
- Easily prioritize applications for bandwidth needs
- Higher network availability with real-time circuit access redundancy
- Second circuit providing backup capability and more bandwidth

Benefits of DQE's SD-WAN

- Enhanced performance, making your apps smarter and faster
- Secure connection for all users, regardless of location
- Supports remote locations outside of DQE's footprint
- Improved agility and real-time adjustments
- Simplified management of all branch and remote users
- Reduced cost of ownership by freeing your IT staff to focus their time managing higher priority projects and applications
- Dedicated local support that keeps you on-line 24/7

Unlock the power of connectivity with DQE.
