

MANAGED SD-WAN

Keep Your Business Running at Full Speed

DQE's Managed SD-WAN combines a robust, 100% fiber-optic network with Fortinet's leading networking technology to deliver a high-performing, application-aware managed network. Built for today's cloud-first businesses, it ensures maximum uptime, superior application performance and seamless connectivity for companies of all sizes.

Enhance Productivity and Performance

Turn your network into a driver of business success with DQE's SD-WAN:

- **Optimize application performance**
- **Simplify operations** and reduce costs
- Free your IT teams to **focus on strategic priorities**

SD-WAN architectures deliver a host of significant benefits for clients of all sizes and industry verticals.

Benefits	Details
Application Optimization	Ensures the highest level of application availability and performance over any WAN transport
Dynamic Link Failover	Automatically routes traffic over alternate circuits in case of link failure or under-performance
Self-Service Portal	Provides visibility, analytics, reporting and control
WAN Remediation	Corrects for packet loss and reduces overall latency
Advanced Security	Converges the most advanced NGFW and routing to deliver consistent security on-and off-network
Primary & Secondary Connections	DQE provides fiber and wireless access connections for SD-WAN, ensuring redundancy and availability

Why Choose DQE's SD-WAN?

Powered by Fortinet, the most trusted name in network and security solutions, DQE's SD-WAN delivers a best-in-class experience backed by expert local support.

Key Features:

- **Resilience and Reliability:** Real-time failover ensures maximum uptime.
- **Powered by Fiber:** High-speed, low-latency connectivity through DQE's fiber network.
- **Local Support:** Dedicated, responsive experts to keep your network running smoothly.
- **Integrated Security:** Easily integrates with DQE's Managed Security Services, leveraging Fortinet's award-winning security technology.
- **Dynamic Traffic Management:** Automatically optimize bandwidth for critical applications.
- **Scalable and Flexible:** Add new locations and services with ease.
- **Centralized Control:** Simplified network management with advanced monitoring tools.

Recognized Excellence

In addition to being recognized as a performance leader in the 2024 Gartner® Magic Quadrant, Fortinet is the only vendor to be recognized with the Gartner® Peer Insights™ Customers' Choice for SD-WAN with the highest number of customer reviews of all vendors five years in a row.
