

Better Infrastructure. Built for Lancaster.

Custom connectivity and network solutions for the institutions that anchor the region

Lancaster County is growing, yet enterprise networks are hitting new limits:

- Cloud migrations are accelerating.
- AI features sharply increase baseline bandwidth needs.
- Teams are spread across HQ, branch, and remote environments.
- Security expectations rise with every audit.

While national providers overlook the area, oversubscribe bandwidth, or pull back from regional markets, DQE is investing. We're bringing scalable fiber closer to where work happens and sitting down with IT leaders to align capacity and resiliency with future-state needs.

Built for Business

DQE is a business-only infrastructure provider with 100% fiber connectivity available in Lancaster. The network is engineered with dual-core rings, built-in route diversity, and sub-second failover, which means you get a resilient network built for business demands.

A Better Model

We don't build on speculation, and we don't disappear after the install. DQE works shoulder to shoulder with the decision-makers who design and direct your network strategy — and we're right here when you need to scale, shift, or solve.

Enterprise Solutions

- Dedicated Internet Access (DIA)
- Internet Pro
- Metro Ethernet
- Wavelengths
- Unified Communications
- Managed SD-WAN
- Managed Wi-Fi
- Wireless Failover
- Cloud Connect
- Colocation
- DDoS Mitigation
- Managed Firewall
- Managed Security

Reliably Reliable™ Is More Than a Tagline – It's a Commitment.

ALWAYS-ON PERFORMANCE

Ensures continuous access to critical systems and applications

SUB-50MS REROUTING

Maintains session integrity in the event of link failures or disruptions

24/7/365 SUPPORT

Connects you directly to local engineers for immediate issue resolution

Network Built for Lancaster

DQE offers a new fiber network option in Lancaster — and we're actively investing to extend it further.

From the area's largest institutions to small businesses and everything in between, our goal is simple: make sure Lancaster enterprises have the connectivity they need to grow. And because we're a local provider, we're committed to this market in a way national carriers aren't, building where it matters most for the businesses that power our community.

"Our investment in Lancaster isn't speculative. We're here to work with the institutions that keep this region moving, and we're committed to building infrastructure that's worthy of the work being done here."

- Mike Sicoli, Chief Executive Officer, DQE Communications

Why DQE

Not the Biggest. Just the Most Responsive.

This network was built for critical infrastructure, and now it powers connectivity for the region's most essential operations. For institutions that lead, DQE delivers the resilience you expect and the collaboration you rarely get from national providers.

RESILIENT BY DESIGN, RESPONSIVE ALWAYS

Redundant paths. Sub-second rerouting. 100% fiber network. Every layer is designed for continuity.

FULL INFRASTRUCTURE OWNERSHIP

We own the fiber, the design, and the outcome. No resellers. No runaround.

BUILT WHERE OTHERS WON'T

Expansion continues in markets national carriers pass by, driven by long-term regional commitment.

Big Plans? We Build for That.
